

Advancing antibody fragment therapeutics

ESBATEch is a Zurich, Switzerland, based Biomedical Research Unit of Alcon, the world leader in Ophthalmology. As an independent Alcon center of excellence, we are focused on advancing therapeutic antibody fragments in Ophthalmology and working on both preclinical and clinical programs for different therapeutic indications.

For the expansion of our *Assay Development Team* we are looking for a

GLP Manager (100%)

Your responsibilities:

You are working in a small team that is responsible for the development of bio analytical methods (potency assays, PK assays, immunogenicity assays etc.) for characterization of single chain antibody fragments. You will be involved in implementation and maintenance of a GLP laboratory for bio analytical testing. As a study director, you will be responsible for bio analytical method validation and sample analysis for preclinical studies. Furthermore, you will be responsible for the management of assay transfer and validation to/at CROs.

Your profile:

- Ph.D. or Master's degree in biology, biochemistry or a related discipline or comparable professional work experience
- Proven expertise in development and validation of immunoassays/bioassays in an industrial environment (e.g. CRO)
- Work experience in a GLP laboratory and knowledge on principles of GLP regulations are required
- Profound knowledge on application of statistical methods for analysis and validation of immunoassays and bioassays
- Experience as study director and principal investigator for GLP studies is an asset
- Flair for highly accurate work/processes and management of collaborations with CROs/customers, good communication skills, pronounced sense of responsibility, well organized, and highly motivated to work in a small interdisciplinary team
- Good command of English and preferably German

A young, dynamic and international team working on highly innovative research and development activities is waiting for you. Your engagement will be remunerated with a performance oriented compensation and opportunities for personal development.

Are you interested in new challenges? We are looking forward to receiving your complete application documents with reference RD0310 by e-mail or post mail. Your contact person is Mrs. C. Müller.
